"I really like the Signature Primes. Super MTF, fast and not too sharp contrast. They are extremely fast and have a great flare resistance."

Cinematographer Yvan Muro, ASC

"The image that the LF and the Signature Primes produce seems to me, more like what my eyes see than anything else I’ve experienced so far."

Cinematographer Régis Chateau, ASC, AIC

"Focus pulling is the art of remembering the past and imagining the future. The WCU-4 never let me down."  

1st Assistant Camera Karl Keil BVK, VRFF

"The most important advantages of AMIRA are definitely the picture quality and its versatility. There are no longer any two types of cameras, only the AMIRA."

Founder and CEO of VPS Media Andreas Schech

"I could not have captured "Sea of Shadows" the way I did without the Master Grits. With one hand I was holding onto the boat, with the other I was able to change the focus, iris and zoom with the Master Grits."

Cinematographer Bernd Fischer

"I’m in love with the TRINITY. Since doing "La La Land," I have felt less enthusiastic about working Steadicam, but now with TRINITY it’s like I get to start all over again. TRINITY has renewed my faith in the tools we harness."

Steadicam/TRINITY operator Ari Robins

"Focus pulling is the art of remembering the past and imagining the future. The WCU-4 never let me down."

1st Assistant Camera Karl Keil BVK, VRFF

"The ALEXA LF creates a painterly and cinematic image that I really love. Also, it has the same build quality that I’ve trusted for many years. Since we liked the vibrations, we just hard-mounted the cameras to our cars for race scenes, but the camera never failed us."

Cinematographer Phedon Papamichael ASC, GSC

"The wedding of the ALEXA LF and the Signature Primes is an absolute winner! Wow, what a beautiful lens, brilliant skin tones!"

Cinematographer Stijn Van der Veken ASC, SBC

"The SRH-3 is a must-have. I never thought it would be possible to film on a race track at speeds of over 120 mph and hold a perfectly stabilized image throughout. The SRH-3 brings creative visions to new levels, allowing me to capture shots with utmost confidence."

Cinematographer Nino Pansini

"I’m in love with the SRH-3. Since doing "La La Land," I have felt less enthusiastic about working Steadicam, but now with SRH-3 it’s like I get to start all over again. SRH-3 has renewed my faith in the tools we harness."

Steadicam/TRINITY operator Ari Robins

"The wireless video signal is the best I’ve come across. It’s almost as good as the recording quality. It’s absolutely beautiful. I mean no noise, you see everything just like as if the cable were hard-wired directly from the camera to the monitor."

Cinematographer Marc Windon

"The SRH-3 is a must-have. I never thought it would be possible to film on a race track at speeds of over 120 mph and hold a perfectly stabilized image throughout. The SRH-3 brings creative visions to new levels, allowing me to capture shots with utmost confidence."

ARRI camera system approach
Integrated product lines for seamless compatibility

For over 100 years, ARRI has been making tools that expand creative possibilities for filmmakers. Today, the uniquely wide range of interconnected camera products available from ARRI reflects the company’s system approach, whereby individual products work well with third-party gear, but extra value is added if all components are from ARRI. To maintain third-party compatibility, ARRI establishes industry standards, works closely with other manufacturers, and provides its image processing technologies to developers of postproduction tools. But on set, nothing will unlock more features and ensure greater peace of mind than keeping everything ARRI.
Large-format cinematography

Broadening the horizon

Shooting in large format is like painting on a bigger canvas. Different stories call for different tools, and cinematographers are increasingly turning to larger formats for certain productions. It might be to enhance the cinematic feel, or capture the detail of landscapes, or enhance background separation for close-ups that pop out of the screen. Whatever the creative reason, working with a sensor that is twice the size of Super 35 brings new storytelling opportunities. ARRI’s large-format cameras will sit alongside its continuing developments in Super 35, giving filmmakers an unprecedented palette.

Enlarge your vision

The ARRI large-format camera system

Meeting and exceeding modern production requirements, the ARRI large-format camera system delivers unprecedented creative freedom. Based around a large-format 4.5K version of the ALEXA sensor, the system comprises the ALEXA LF and ALEXA Mini LF cameras, ARRI Signature Prime lenses, LPL lens mount, PL-to-LPL adapter, and Lens Data System LDS-2. These system elements have been designed to take full advantage of the enlarged sensor, while also offering compatibility with existing lenses, accessories, and workflows.

- Immersive large-format look
- ARRI color science for natural skin tones, easy color correction, and clean VFX
- Highest dynamic range of any production camera system
- Lower noise with higher usable sensitivity
- Perfect for High Dynamic Range (HDR) and Wide Color Gamut (WCG) displays
- Robust and reliable
- Fast and efficient workflows
Large-format look, with ALEXA image quality
Two cameras, covering every requirement on set

Featuring a sensor slightly larger than full frame, ALEXA large-format cameras record native 4.5K with ARRI’s best overall image quality. This allows filmmakers to explore their own take on the large-format look, with improvements on the ALEXA sensor’s famously natural colorimetry, pleasing skin tones, low noise, and suitability for High Dynamic Range (HDR) and Wide Color Gamut (WCG) workflows. The combined feature sets and form factors of the two cameras, along with versatile recording options, encompass all on-set requirements.
LPL mount

A new industry standard

The PL mount, which has been an industry standard for decades, was introduced by ARRI for 35 mm cinematography and shared with other manufacturers. For the new era of large-format and mixed-format cinematography, ARRI has designed the bigger LPL mount, again sharing it with other camera and lens manufacturers. Allowing smaller lens designs and better image quality for large-format capture, the LPL mount can also be used with a PL-to-LPL adapter, offering backwards compatibility with PL mount lenses.

- LPL mount available for ALEXA LF/Mini LF, ALEXA Classic/XT/SXT/Mini, AMIRA, and ALEXA 65
- Third-party cameras can also be fitted with a LPL mount
- Purpose-designed for large-format digital cinematography
- PL-to-LPL adapter allows the use of PL mount lenses
- Robust and rock-steady locking mechanism

- 3rd party adapters
  - PL-to-LPL adapter

ARRI Camera Systems | LPL mount
So small, so light, so full of capabilities

Compact, lightweight, and self-contained—ALEXA Mini is the versatile allrounder in the ARRI camera family. The symmetrical design permits filming in any orientation, including upside-down and in portrait mode, while multiple accessory points enable highly creative mounting solutions and rapid configuration changes. In addition, ALEXA Mini features an interchangeable lens mount, allowing the use of B4 video lenses, EF mount stills lenses, or even ARRI Signature Primes with the LPL mount for ALEXA Mini.

- Lightweight body with sturdy design
- Best overall ALEXA image quality in Super 35
- Huge variety of lens options
- EXT SYNC mode for 360° VR, 3D, and VFX applications
- ARRI Look Library support
- ALEXA image quality up to 200 fps
- Single-user ergonomics
- Unlimited in-camera grading for stunning looks
- Huge variety of lens options
- Future-proof for HDR and 4K
- Integrated wireless video
- Four independent monitoring outputs: EVF, MON OUT 1-3
- Wide range of media options and recording formats
The ARRI lens brand
Optics designed and built to ARRI’s requirements

Building on many decades of experience designing, commissioning, and marketing co-branded lenses, ARRI now excels as a world-renowned lens brand in its own right. Lenses bearing the stand-alone ARRI brand can be depended upon by cinematographers to be durable and reliable under all conditions, and most of all to render extraordinary images with the most desirable visual attributes.

Cooperation with the best
Optics created in partnership with industry leaders

ARRI has a long history of working with the world’s greatest optics companies to create lenses of the same exceptional quality and precision as its cameras. These lenses are conceived and specified by ARRI, and then manufactured by the optics partners. With a complete understanding of cinematographers’ needs, ARRI consistently produces lenses that become workhorses of the industry.

ARRI Signature Prime
A new and unique look never before seen in a cinema lens, consistent across 16 focal lengths ranging from 12 mm to 280 mm.

ARRI UWZ/AUWZ
These spherical and anamorphic ultra-wide zooms produce distortion-free, wide-angle perspectives of stunning quality.

ARRI/Zeiss Master Prime
A new era for anamorphic: traditional anamorphic bokeh in a distortion-free image, with fast T-stop.

ARRI/Zeiss Master Anamorphic
A new era for anamorphic: traditional anamorphic bokeh in a distortion-free image, with fast T-stop.

ARRI/Zeiss Master Macro
The highest quality cinema macro in the world. Unrivaled performance for product photography, skin and cosmetics, food, etc.

ARRI/Zeiss Ultra Prime
Lightweight, classic, workhorse lenses. A solid, affordable choice with a long cinematic history.

ARRI/Fujinon Zoom Lenses
Consistent high quality throughout the zoom range. Unparalleled performance in a small, lightweight lens series.
Modern lens, timeless look

Equipped with an LPL mount that allows them to be used not just on ARRI cameras, but also on third-party cameras, the Signature Primes encompass a uniquely wide focal length range of 12 mm to 280 mm for large-format cinematography. Solidly built and designed to work flawlessly in the most extreme on-set conditions, these lenses offer a classic look that will not go out of style: warm textures, open shadows with crisp blacks, smooth focus fall-off, and bokeh like looking through a window in the rain.

- Exceptionally soft bokeh for pleasing background separation
- Soft and delicate flares
- Fine details beautifully rendered
- Optimal results with all sensors due to near-telecentric design
- Fitted with new LPL lens mount
- Covering all image circles up to large format 46 mm

ARRI Camera Systems | Signature Prime lenses
Huge perspective range, consistent look

Magnetic Rear Filter Holder
Create your own Signature Prime look

The detachable Magnetic Rear Filter Holder for ARRI Signature Primes opens up all kinds of personalized creative looks, without having to disassemble the lens. The filter holder accommodates a wide variety of materials, allowing filmmakers to experiment as much as they want. Glass elements can be used to simulate vintage lenses, with images sharp in the center but deteriorating in the corners. Anything from tinfoil and fishing line to stockings, wrapping paper, and vintage fabrics can be tried—each of them affecting bokeh, flaring, and diffusion in different ways.

-2.5 Diopter
The negative diopter softens the image by erasing fine detail. Some background textures are preserved but background contrast is dramatically reduced. Objects at the frame edges smear inward.

+2.5 Diopter
The positive diopter emulates a classic portrait lens, softening the image without erasing fine detail. “Donut” bokeh preserves background textures and contrast. Objects at the frame edges smear outward.

• Endless choices to customize the optics
• Filmmakers can experiment themselves
• Fast and easy changes of look, with no tools needed
• Can complement ARRI's uncoated replacement front element
FSND Filter
The front line of image control

ARRI FSND Filters leave image control to the cinematographer; they are entirely color neutral, exceptionally resistant to flare and glare, and introduce no discernible image distortions at even the longest focal lengths. Most importantly, they eliminate far red (“IR”) contamination without affecting skin tone. ARRI FSND Filters are consistent, reliable, and worry free, perfectly matching in-camera ARRI FSND Filters and delivering significant competitive advantages for all shooting conditions.

- No shift in contrast or color saturation
- Fast and easy to clean
- Top-quality glass preserves high-resolution detail
- C-shaped filter edges resist chipping and reflection
- Durable hard coating, plus oil and water resistance
- Internal camera filters from ALEXA Mini & AMIRA for matte boxes

ARRI FSND Filters preserve color balance perfectly, eliminating color distortions and preserving skin tones. They are universal filters that produce the same high-quality result with every camera.
ARRI Broadcast Solutions
Professional services for broadcast and media applications

ARRI’s expertise in HD and 4K/HDR camera systems, lighting, postproduction, and equipment rental guarantees a deep understanding of the broadcast and media production environment, from beginning to end. The company’s cross-disciplinary capabilities, together with its competence in state-of-the-art lighting workflows, sets it apart from the competition. The ARRI System Group provides turnkey lighting solutions for tomorrow’s production infrastructures, while the ARRI Multicam System gives program makers flexibility tailored to their varied needs.
ARRI Multicam System
Remote control of AMIRA and ALEXA Mini for live TV

ARRI offers this simple-to-integrate fiber transmission system in partnership with British manufacturer DTS, combining the cinematic look of ARRI cameras with the efficiency of a live transmission system. Customers can record in-camera for postproduction, finishing, or slow-motion effects, while simultaneously transmitting live HD or UHD signals to a broadcast facility, stage displays, or social media channel using standard production environments such as OB vans or studios.

- Cinematic images for live TV, with many look options
- BT.2100 support with HLG or PQ
- Versatile and efficient transmission system
- Best HDR images with ARRI cameras
- One system covers Multicam, documentary or drama

ARRI cameras for the best HDR results, even in SDR
Scenes with a high contrast range, which are not possible to capture with conventional broadcast cameras, can be recorded in all their detail thanks to the high dynamic range of the ARRI image sensor, even in SDR/Rec. 709.
Stabilized Remote Heads SRH-3 and SRH-360
Compact, powerful, extremely flexible

The SRH-3 and SRH-360 are three-axis, fully stabilized remote heads that allow cameras to go where no other heads can with incredible flexibility and ease. Whether it be on a cine set, in a TV studio, or at an event, the SRH-3 and SRH-360, together with digital controllers such as the DEH-1 and Master Grips have the full force of ARRI technology behind them and can be combined with all ARRI CSS accessories like the SAM plates and external radio modules. Upgrade your existing SRH-3 to the SRH-360 and get a 360-degree range of motion with the newly designed pan axis with slip ring.

Digital Encoder Head DEH-1
Precise control via remote fluid head

ARRI’s brand-new DEH-1 is the first fully digital encoder head that communicates through the LBUS protocol with the SRH product family. Rugged and easy to operate, the DEH-1 features reliable construction and precision engineering, making it ideal for a variety of remote head applications—from broadcast settings, to documentary shooting, to feature film productions.
Digital Remote Wheels DRW-1
Traditional movie-style operating

The Digital Remote Wheels DRW-1 combine state-of-the-art digital technology with components inspired by the classic ARRIHEAD, which was used and loved by generations of filmmakers. The mechanical touch and feel of the crank wheels come with a bang-up-to-date digital workflow to provide maximum control… and they’re also really fun to work with.

ERM-900, ERM-2400 SRH and ERM-2400 LCS
Long-distance wireless control

The new External Radio Modules ERM-900 (900 MHz), ERM-2400 SRH and ERM-2400 LCS (both 2.4 GHz) provide a reliable point-to-point radio link for the most demanding RF environments, using spread spectrum technology for a long range, robust radio connection. The rugged housing and solid form factor make them perfect for car rigs and related setups. Pairs of ERM-900 or ERM-2400 SRH radio modules connect the SRH remote control panel and the SRH-3 and SRH-360 stabilized head, while the ERM-2400 LCS connects ECS devices such as WCU-4 or SXU-1 to cameras and motor controllers.

- Digital interpretation of classic ARRI crank wheels
- Controls the ARRI SRH product family through the LBUS protocol
- Highly modular design and workflow
- Can be combined with ARRI Master Grips and OCU-1
- Compatible with any Mitchell flat base tripod or support

- Digital interpretation of classic ARRI crank wheels
- Controls the ARRI SRH product family through the LBUS protocol
- Highly modular design and workflow
- Can be combined with ARRI Master Grips and OCU-1
- Compatible with any Mitchell flat base tripod or support

- Long-range wireless link for SRH or ECS devices
- 1,000 m/3,280 ft range with ERM-2400 SRH and ERM-2400 LCS
- 3,000 m/9,840 ft range with ERM-900 SRH
- Frequency hopping for maximum radio link robustness
- Best possible transmission on location
First hybrid camera stabilizer

TRINITY combines classic mechanical stabilization with advanced active electronic stabilization, provided via 32-bit ARM-based gimbal technology. This combination results in five axes of control and enables uniquely fluid, wide-ranging, and precisely controlled movements for unrestricted shooting and total creative freedom.

- Five-axis hybrid camera stabilizer with stabilized tilt and roll
- High-torque brushless motors with a payload capacity up to 30 kg/66 lbs
- Fast and easy setup due to cross-system accessories
- Highly modular, upgradable and future-proof design
- Hot swap, high-capacity 12 V camera power supply (optional 24 V upgrade)
- TRINITY can also be used as a two-axis standalone handheld gimbal

Wide range of ARRI CSS components and accessories available
Modular and upgradeable design for long product life
Hot swap and high-capacity 12/24 V camera power supply
1.8” carbon fiber post with no-tool clamp and unique fine-trim adjustment
Low-friction gimbal with patented self-centering feature
Made for modern digital cinematography, broadcast, and events

Modular, upgradeable stabilizers

The ARRI artemis Cine Broadcast and EFP HD mechanical stabilizers cover the entire spectrum of today’s film and television requirements. Designed to work with HD broadcast cameras, the EFP HD features 12 V high-capacity wiring that enables capacities for the camera of up to 15 A and minimizes voltage drop, while the hot swap technology helps avoid camera reboots when batteries run low. The Cine Broadcast also includes three-high-quality video lines and both D-Tab and USB power outputs, providing new possibilities and more robust backup options.
ARRI Wireless Video System
Conforming with local transmission rules

The ARRI Wireless Video System (WVS) consists of integrated HD video transmitters in ALEXA LF and ALEXA SXT W cameras, a stand-alone video transmitter for use with other ARRI or third-party cameras, and a stand-alone video receiver that picks up signals from either transmitter. The newest member of the family is the small and lightweight WVR-1s receiver, which can be quickly paired with the ARRI WVS transmitter and has an operational range of up to 150 m/500 ft. Its minimal size and weight make it easy to incorporate into a battery-powered, handheld viewing setup.
• Three axes, all inclusive
• Vibrating markers and alerts
• Backlit focus knob
• Easy-to-read lens data display
• Pre-marked focus rings
• Personalized settings

The SXU-1 is a simple, single-channel wireless hand unit that can be set up to control focus, iris, or zoom. On set it perfectly complements the WCU-4 as a separate iris control unit, perhaps operated by the cinematographer in situations where subtle exposure adjustments are required during travelling shots.

• One-axis lens control
• 14 radio channels
• Backlit focus knob
• Supports motor and knob limits
• Optional mounting gear

Single Axis Unit SXU-1

Do one thing well

Wireless Compact Unit WCU-4

It’s all in your hands

The WCU-4 is a three-axis handheld controller featuring an integrated lens display. It allows wireless control of camera functions, focus, iris, and/or zoom when shooting handheld or using a stabilizer, gimbal, or crane. The super-smooth focus knob features adjustable friction and backlit focus rings that are easy to read in the dark, and the large display reflects ambient light to remain visible even in direct sunlight, while also saving battery power.
Operator Control Unit OCU-1
Taking control at critical moments

The small and compact OCU-1 allows camera operators to quickly take control of any lens function, even when lens motors are attached. With it, operators can override and reclaim focus, zoom, and iris controls from the WCU-4, at the touch of a button. This could be useful for making compositional adjustments while setting up a shot, or even during a shot, if the operator can sense an unplanned situation unfolding, or wishes to tweak a lens setting.

- Small, solid and lightweight
- Three assignable user buttons
- Control of focus, iris, or zoom
- Can override the WCU-4 hand unit
- Control EF lenses without motors
- Flexible mounting options

Master Grips
Ultimate handheld control

ARRI Master Grips come in a variety of configurations to suit individual operators and a multitude of purposes. Based on classic ARRIFLEX handgrips, they incorporate finger wheels and rockers on either the left or right side, as well as assignable user buttons that allow personalized camera and lens control.

- EF, ENG, and cine lens control
- Advanced camera control
- Solid mechanical design
- Proven ergonomics
- Intuitive user interface
- Multi-lingual display
Lightweight matte boxes
Choose flexibility

Suited to a wide range of applications, these robust but lightweight matte boxes provide unprecedented flexibility. From a single-filter configuration for gimbals, drones or Steadicams, to clamp-on versions, up to rod-mounted solutions, the LMB 4x5 and LMB 6x6 make short work of challenging situations. The Swing Away Tilt Module offers a comfortable swing-away function (with extension) for easier lens changes, as well as an integrated tilt module with 10° up and down adjustments for avoiding unwanted reflections. Both matte boxes also feature versatile filter stage options, securing loops, and a tray catcher for maximum safety on set.

LMB 6x6:
- 6.6" x 6.6" filter size
- 19/15 mm studio rod support
- New tray catcher system for each filter frame

LMB 4x5:
- 4" x 5.65" and 4" x 4" filter size
- 15 mm LWS and 19/15 mm studio rod support
- Attractive upgrade options for LMB-25 owners
Diopter accessories
With safety device for trouble-free diopter changes

Benefiting from ARRI’s famously sturdy build quality, these accessories simplify the use of dioplers with lightweight matte boxes from ARRI or other manufacturers. They feature a safety device to stop dioplers falling out when being changed.

- For 4.5", 138 mm, and 6" dioplers
- Accommodate up to three dioplers
- Safety mechanism to prevent accidental drops
- Diopter Stage with friction wheel and locking device for split dioplers
- Mountable through ¼" threads

Rota Pola Filter Frame
Easy-to-use rotating polarizers

Available in two versions for different filter sizes, ARRI Rota Pola Filter Frames make it simple to work with rotating polarizers in modern matte boxes. Being the same thickness as a regular filter frame, they only take up one space in a filter stage.

- For 4" x 5.65" and 6.6" x 6.6" filters
- Unique lock system prevents unintended adjustment
- The filters take less than 1.2 stops of light
- Friction-driven gear at the top and bottom
- Thin design for minimal bulk and weight

B-Mount
A new standard 24 V battery mount

The B-Mount battery mount from bebob is an open standard endorsed by ARRI and the wider industry. Most battery manufacturers are developing B-Mount products, recognizing that modern digital cameras and lights often exceed the limits of today’s systems. By establishing an open, international standard that meets today’s needs and is cross-compatible across all manufacturers, the B-Mount will enable productions to source batteries locally, rather than transporting them.

- Specifications are fully documented and open to any company
- High-capacity, future-proof power for cameras and lights
- Robust construction, compact form factor, and seamless interlocking
- Suited to modern camera stabilizer systems and compliant with on-board safety standards for the lighting industry
- B-Mount will power future ARRI cameras and lights. Bi-voltage ready

Unit Bags II
The best way to protect and transport your gear

The unit bags offer a rugged solution for organizing and transporting camera gear and accessories. The exterior is constructed from a highly durable, waterproof material, while the interior is fully padded to provide ample protection from the rigors of life on set.

- Highly protective
- Durable and waterproof material
- Easy access to on-set tools and accessories

Unit Bags
Unit Bag Small II
265 x 470 x 265 mm

Unit Bag Medium II
290 x 600 x 330 mm

Unit Bag Large II
300 x 670 x 365 mm

Discover all functionalities of the Unit Bags II on our ARRI YouTube Channel.

ARRI accessories bring film-style functionality and the rugged build quality for which ARRI is famous to cameras from other manufacturers, allowing them to be used more easily and reliably in challenging, fast-paced professional environments. Bespoke base plates, top plates, handles, and brackets make ARRI accessories compatible with specific third-party cameras.

Accessories for third-party cameras
Covering most professional cameras on the market

Canon C500 MKII
- Side brackets for more stability and protection
- Built-in lens adapter support option
- More stable shoulder plate

Sony FS7II/FX9
- Side brackets for more stability and protection
- Built-in lens adapter support option
- More stable shoulder plate

Sony FS7II/FX9
- Side brackets for more stability and protection
- Built-in lens adapter support option
- More stable shoulder plate

**CODEX Compact Drives**

- Advanced MXF (ARRIRAW) and MXF (ProRes) recording
- 1 TB (960 GB usable capacity) 8 Gbps solid-state drive
- Durable housing with optimized thermal design
- Direct access to recorded data via the ARRI UDF file system

**CODEX Device Manager**

- Free-of-charge macOS menu bar application
- Required for SRX Capture Drive Dock
- Optional High Density Encoding of ARRIRAW original camera data from a Compact Drive or Capture Drive

**CODEX Compact Drive Reader**

- Bus-powered, single-slot card reader/writer
- USB-C interface for up to 8 Gbps read speed
- Supports macOS/Linux with ARRI UDF file system

**CODEX Compact Drive Dock**

- High-speed single-slot card reader/writer
- Single Thunderbolt 3 interface for up to 20 Gbps read speed
- Supports macOS/Linux with ARRI UDF file system

**CODEX Compact Drive Adapter**

- For access to a Compact Drive in the SRX Capture Drive Dock
- Offers read speed of up to 20 Gbps (with Thunderbolt 3 Dock)
- SRX Capture Drive Dock requires CODEX Device Manager and only works with macOS

**CODEX High Density Encoding**

- 40% savings, no loss of image quality

Codex High Density Encoding (HDE) uses sophisticated, loss-less encoding to reduce ARRIRAW file sizes by around 40% during downloading or later in the workflow. While exhibiting a smaller footprint, HDE is not compromising on quality: it is bit-identical to a full-blown ARRIRAW file! HDE lowers storage costs, shortens transfer times, and speeds up workflows, which translates to a direct 40% saving in time and money. HDE is free-of-charge for use with Codex Capture and Compact Drives, openly shared, and fast: ARRIRAW Open Gate 4.5K can be encoded comfortably at 24 fps on a modern MacBook Pro.

**Storage costs and HDE savings**

Large-format camera system project (10 million frames/116 hours)

Online support for your shoot and post workflow
Free tools, tips, apps, and learning resources

ARRI’s many years of experience producing the widest range of professional filmmaking tools available from any manufacturer, its direct contact with producers and creatives, and its knowledge of postproduction, all give the company a unique insight into every stage of the production chain. This, combined with ARRI’s system approach, enables it to develop functional and educational resources that help filmmakers get the most out of their technology. A range of free-of-charge tools, apps, and tutorials can be found in the Learn & Help section of ARRI’s website.

Frameline & Lens Illumination Tool
A single online tool for creating custom frame lines for ARRI cameras and for checking how different lenses illuminate different ARRI sensor sizes, recording formats, target aspect ratios, and frame lines.

Extended warranty
Registered equipment ensures peace of mind

ARRI’s extended warranty packages for ALEXA, ALEXA Mini, and AMIRA cameras offer a fixed cost of ownership, minimized downtime, and a level of service that goes beyond the standard.

• Fixed cost of ownership
• No unexpected repair bills
• All parts and labor covered
• Priority repairs
• Available at point of sale, or after delivery
• Highly economical annual cost

Purchase a one-year extended warranty along with your camera, or later through any official ARRI point of sale: subsidiaries, distributors, or resellers.

Register your AMIRA, ALEXA Mini or ALEXA within one month of purchase and get a free six-month extended warranty.
