Software Compatibility Notes

Please note that the [ARRI Reference Tool \(ART\)](#) has replaced our ARRIRAW Converter (ARC), ARRI Color Tool (ACT) and ARRI Meta Extract (AME).

Please update the [ARRI Reference Tool \(ART\)](#) to the latest available version for best experience when working with ALEXA 35 footage.

Please note, that macOS X version 10.14.4 (or later) is required to successfully transfer data from a Codex Compact Drive with the Codex USB-C Compact Drive Reader, or the SXR Capture Drive Dock with the Compact Drive Adapter. Using older versions of macOS will result in a copy error for files larger than 9.66 GB. MacOS X version 10.15 (or later) with the Apple MXF plug-in ("[Pro Video Formats](#)") should be installed and updated to play back MXF/Apple ProRes footage in Apple QuickTime Player.

Please update to the latest [Codex Device Manager](#).

Please note: Currently ARRI is offering ARRI Image SDK Version 8.3.1 and ARRI MXF Library Version 4.3.5. Our Partners are being informed constantly about any version updates.

The following table gives you an overview of tools and software, which fully support ALEXA 35 files.
