A. Supporting Tools & Software

Software Compatibility Notes

Please note that the ARRI Reference Tool (ART) has replaced our ARRIRAW Converter (ARC), ARRI Color Tool (ACT) and ARRI Meta Extract (AME).

Please update the ARRI Reference Tool (ART) to the latest available version for best experience when working with ALEXA 35 footage.

Please note, that macOS X version 10.14.4 (or later) is required to successfully transfer data from a Codex Compact Drive with the Codex USB-C Compact Drive Reader, or the SXR Capture Drive Dock with the Compact Drive Adapter. Using older versions of macOS will result in a copy error for files larger than 9.66 GB. MacOS X version 10.15 (or later) with the Apple MXF plug-in ("Pro Video Formats 2.2.3") should be installed to play back MXF/Apple ProRes footage in Apple QuickTime Player.

The following table gives you an overview of tools and software, which fully support ALEXA 35 files. **A lot of manufacturers are working on support for the new camera yet.**

Overview

This overview is 'work in progress' and will be updated continuously.

Manufacturer	Software / Tool	Version Nr. (and later)	Support for					Info
			MXF/ARRIRAW	MXF/Apple ProRes	ARRIRAW-HDE	ARRI Look File 4 (ALF-4)	REVEAL processing for ALEXA LF & ALEXA Mini LF ARRIRAW
