RF-2400 Radio Module Pairing Guide
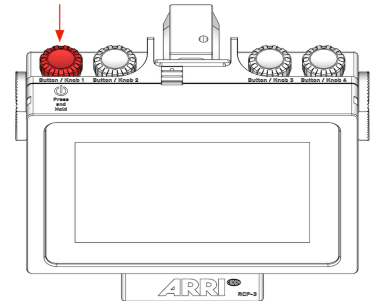

For ARRI TRINITY 2 SUP 1.4

# 1   Pairing the TRINITY 2 RF-2400 Radio Modules

| ADVICE |
|---|
| Both RF-2400 Radio Modules can only be paired through the Remote Control Panel RCP-3. |

► Power up and switch on the RCP-3
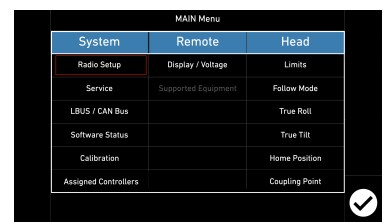

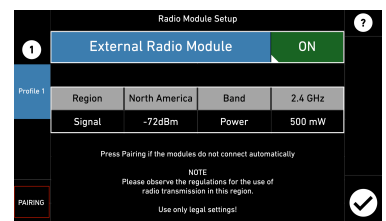

► Insert the **first** RF-2400 Radio Module
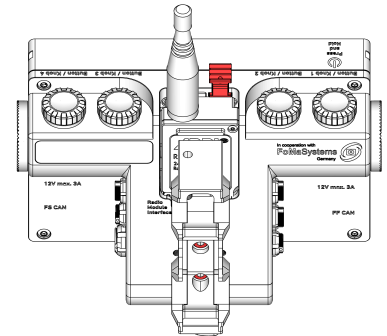

► Go to the **Main Menu**.
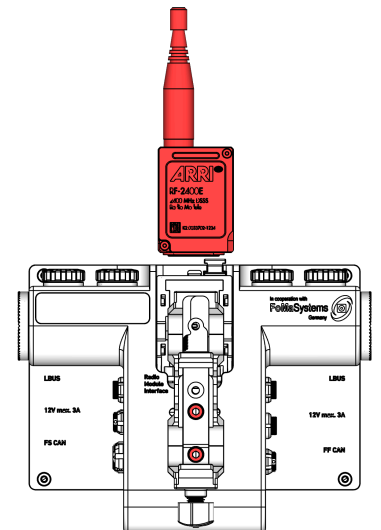

► Tab **Radio Setup**

► Tap **Pairing**

► After a short time, you will be asked to remove the first module and insert the second module.

► So, **remove** the **first** radio module and insert the second module.

► Insert the **second** radio module.

► Again, after a short time, the information appears that the second module has also been paired.

► Now you can plug the **first** module into the radio adapter on the TRINITY 2.

ADVICE
Be sure to use the **Rubber Duck antenna** on the radio module located in the TRINITY 2 head.
The standard antenna will **block** the tilt movement of the **tilt axis**!
