

ARRI®

SKYPANEL[®]X
SOFT | MODULAR | HARD

Reach beyond the Sky with SkyPanel X

- Native soft & hard light
- IP66 rated
- Reach up to 4,800 lux at 10m
- 8 pixel zones
- Dynamic CCT range of 1,500 K - 20,000 K
- RGBACL full-spectrum color engine
- Integrated power supply and CRMX wireless control
- Excelling in color rendition, dimming, and beam quality
- Modular system: X21 (2:1), X22 (2:2), X23 (2:3)

SkyPanel X - your all-weather lighting solution

Engineered for resilience against rain, storms, and even cleaning with high-pressure washers, these lights embody innovation, reliability, and durability.

- IP66 rated

X21 Dome - for native soft light

The X21 Dome is a simple, high-quality diffuser that can be mounted on the X21 lamphead with ease. This convenient tool is included with every X21 and is fully compatible with third-party accessories.

S60 Adapter - iconic soft lighting just got better

With an optional S60 Adapter fitted to its front, the X21 is compatible with all SkyPanel S60-C accessories. Established SkyPanel workflows remain unchanged, amplified by the latest lighting innovations.

HyPer Optic - for a brighter, longer, rounder beam

Using the HyPer Optic attachment on an X21 lamphead turns it into a powerful hard light source with a rounded beam. Designed for long throws and punchy illumination, it works seamlessly with third-party accessories.

Modular SkyPanel X - the X22 square panel

SkyPanel X's quick-lock system enables easy modifications to size and function. In the 2:2 format of the X22, use X21 Domes for widespread soft light or HyPer Optics for powerful hard light, or a combination of both.

Modular SkyPanel X - the powerful X23 fixture

Three lampheads on a modular stirrup creates the X23 - a huge soft, hard, or hybrid light with 24 pixel zones. The X23 with three HyPer Optics on the front only needs one X Modular Yoke, one ALL-WEATHER Control Panel, and one DMX profile for a single rounded beam.

Explore the multiple control options for SkyPanel X

- Take manual control via the robust ALL-WEATHER Control Panel
- Enjoy ARRI's LiCo App through native Bluetooth 5.0 setup and control
- Take advantage of LumenRadio's CRMX wireless integration
- Benefit from two Ethernet ports, wired DMX/RDM control, and more

Elevate your console experience with LiOS3

Discover LiOS3 - many new software features await you.

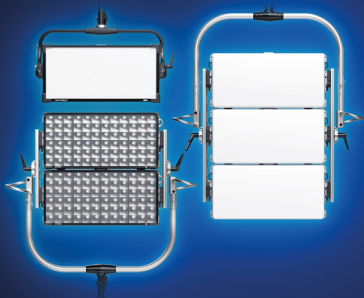

- One single DMX profile for X22 or X23
- CCT and Tint as a layer on top of RGB values
- New DMX presets with activation via DMX
- New ARRI ALEXA Modes
- And much more!

A wide range of SkyPanel X applications

Explore modular panel lighting with SkyPanel X. Find the perfect configuration for your needs with our flexible solution for studio lighting, outdoor film locations, virtual production, broadcast, live events, and more.
