ARRI[®]

SKYPANEL X

Reach beyond the Sky

Introduced as a modular system and configurable into different sizes, SkyPanel X offers native soft, native hard, and open-face lighting. SkyPanel X sets a new bar not only in terms of dimming and color science, but also in lux output and beam quality for medium to long throws. With up to 4,800 lux at 10 m / 32.8 ft and eight pixel zones per LED panel; dynamic CCT range of 1,500 K – 20,000 K; RGBACL full-spectrum light engine; wireless control; integrated power supply; advanced networking possibilities; and an IP66 rating, the SkyPanel X is an all-weather lighting solution tailored to existing workflows.
